

# Building the Rocket: Foundations for Success: The Companion E-book to Riding the Rocket

In our working lives, we are all flying our personal career rocket through space and time and its up to us to choose which direction to fly in and how high to travel. The book *Riding the Rocket: How to Manage Your Modern Career* explores in more detail the process of flying our rocket and making a success of our career. But before we can ignite the engines and blast off into the stratosphere we first need to build our rocket, which leads us to this quick-read companion e-book. It contains unique content and is designed to get us thinking about our rocket, challenges our underlying assumptions and previews the main book. About the author Richard Maun is visiting fellow at a leading UK university and a highly experienced career and leadership coach, who knows what people need to get them moving, increase their confidence and make them more successful. He also lectures on career matters and communication skills at business schools and other institutions and works with a range of senior teams in the private sector. He is the author of several business books, which have been sold around the world and his popular weekly soft-skills blog can be found at [www.richardmaun.com](http://www.richardmaun.com).
