

The Difference Is You: Power Through Positive Leadership

Are you happy with your job and with your career? Are you proud of your company and the people with whom you work? Do you feel like yours is a dead end job? Do you wish you worked somewhere exciting and challenging? Do you wonder if a break will ever come your way? Do your supervisors respect you and recognize your efforts and contributions? Do they listen to you and ask for your input in tough situations? Do they give you the respect you feel you deserve? If you are a supervisor, how would your employees answer these questions about you? Are you happy with your marriage? Is your spouse the kind of supportive partner you would like to have? Are your children turning out the way you hoped? Are your friends everything you want good friends to be? Are you concerned about the direction in which our country is heading? Are you troubled by our nations economic competitiveness in the world marketplace? Do you worry about the bureaucratic ineffectiveness of our government? Does the moral fiber of our society appear to be unraveling? Do you think our systems of education are adequately preparing our children for the future? Do you feel safe in your neighborhood at all hours of the day? Do the myriad of problems confronting our society leave you feeling discouraged and helpless? If you are like millions of other men and women, discouraged and helpless is exactly how you feel but listen closely. The Difference is You: Power Through Positive Leadership is a message of hope. The principles of positive leadership are powerful concepts that will enable individual men and women to change their lives and the world around them far more than they ever imagined possible. The Difference Is You: Power Through Positive Leadership, will outline the philosophical foundations of positive leadership and will present the attributes that distinguish positive leaders from

individuals who go through the motions whether or not they occupy formal management or supervisory positions. Talking about these attributes, however, is not enough; action is what counts. We will show the reader exactly how they can acquire and utilize these attributes in their daily lives. Action plans and action proposals are some of the most important tools utilized by positive leaders in order to accomplish remarkable things. The final section of the book will offer readers a list of things they can do (actions) to transform every aspect of their lives, from family, to the community, to the workplace. In the workplace we will offer things you can do whether you are the boss or an employee. The reader is challenged to believe that the world needs all the positive leaders it can get. That means that the world needs you!
