

# Event-Driven Business Solutions: Today's Revolution in Business and Information Technology

Currently doing double duty when it comes to financial reporting, accounting and information technology professionals have the unique opportunity to improve efficiency by downsizing into one department. Event-Driven Systems explains why this is an important cost-saving measure and shows how to put this revolutionary idea into practice. The authors challenge traditional thinking about accounting and information technology processes and the roles of the professionals who work in these specialized environments.
